Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 June 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 33-42 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the invention originally claimed (in the active claims in the previously office action) is directed to a device, while the invention claimed in claims 33-42 is directed to a method.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 33-42 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 2, 3, 5-8, 21, 22, and 26-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 8 and 21 each

Art Unit: 2811

recite the combination of the subject matters that the first terminal is connected to the first and second semiconductor regions and that the first resistor is coupled between the first terminal and the second semiconductor region, which is not fully supported by the original disclosure. According to the relevant embodiments shown in Figs. 13 and 14, only the first resistor (758) is coupled to the second semiconductor region, while the first terminal (A) is not directly coupled to the second semiconductor region therein. It is further noted that, in the embodiment of Fig. 12, only the first terminal (A) is coupled to the second semiconductor region (128 through the P+ region), while the first resistor (758) is not directly coupled to the second semiconductor region therein.

4. Claims 2, 3, 5-8, 21, 22, and 26-32 are further rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 8 and 21 each recite the combination of the subject matters that the first terminal is connected to the first and second semiconductor regions and that the first resistor is coupled between the first terminal and the second semiconductor region. However, if the first terminal is connected to both of the first and second semiconductor regions, as defined in these claims, the first terminal and the second semiconductor region are then effectively shortened together. It then would effectively shorten the two ends of the first resistor if the first resistor is truly coupled between the first terminal and the second semiconductor region. Similarly, the recited

Art Unit: 2811

second resistor would also be shortened. It is not clear how the recited first and second resistors could be functional if each of the two resistors has already been shortened.

Response to Arguments

5. Applicant's arguments with respect to claims 2, 3, 5-8, 21, 22, and 26-30 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shouxiang Hu whose telephone number is (703)306-5729. The examiner can normally be reached on Monday through Thursday, 7:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on (703) 308-2772. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
